Job Description

At Moody's, we unite the brightest minds to turn today's risks into tomorrow's opportunities. We do this by striving to create an inclusive environment where everyone feels welcome to be who they are—with the freedom to exchange ideas, think innovatively, and listen to each other and customers in meaningful ways. Moody's is transforming how the world sees risk. As a global leader in ratings and integrated risk assessment, we're advancing AI to move from insight to action—enabling intelligence that not only understands complexity but responds to it. We decode risk to unlock opportunity, helping our clients navigate uncertainty with clarity, speed, and confidence.

If you are excited about this opportunity but do not meet every single requirement, please apply! You still may be a great fit for this role or other open roles. We are seeking candidates who model our values: invest in every relationship, lead with curiosity, champion diverse perspectives, turn inputs into actions, and uphold trust through integrity.

Skills and Competencies

- 7-10 years of experience in program management ,change management, product delivery, or professional services within financial services technology
- Deep expertise in Know Your Customer (KYC), Anti-Money Laundering (AML), or financial crime compliance solutions, with strong understanding of banking regulatory requirements and industry best practices
- Proven track record leading large-scale, complex technology implementations within banking or financial services institutions, including direct and partner-led delivery models
- Experience managing partner ecosystems and integrations su as Pega, Fenergo, Quantexa, or similar enterprise solutions

Education

- Bachelor's degree in Business, Computer Science, Engineering, or a related field, required.
- MBA or advanced degree, preferred.

Responsibilities

- Leads global delivery and integration of Moody's banking KYC solutions across direct and partner-led implementations
- Develop and deliver the banking KYC prioritization roadmap, balancing client and partner requirements with internal priorities and resource constraints
- Oversee end-to-end delivery of Moody's EVA, GRID, and Orbis solutions into banking clients, ensuring high-quality, enterprise-scale integrations
- Manage partner-led implementations through Pega, Fenergo, and Quantexa, establishing clear accountability, success metrics, and escalation paths
- Establish governance structures for program oversight, risk management, issue resolution, and executive reporting
- Drive portfolio-level decision making across multiple concurrent implementations to optimize resource utilization and business impact
- Build and maintain executive relationships with banking clients, serving as sponsor for high-priority or at-risk engagements
- Partner with Product Management to translate client and market feedback into product requirements and roadmap prioritization
- Lead cross-functional delivery teams spanning Product Management, Product Engineering, Project Management, and Data Governance
- Define and track key performance indicators related to delivery quality, customer satisfaction, portfolio health, and financial performance
- Build, mentor, and develop a high-performing delivery organization, fostering collaboration, accountability, and continuous improvement
